EDUCATION

Coorg Institute of Technology, Kodagu	2022-2026
BE - Artificial Intelligence & Machine Learning – CGPA – 8.02	
Nisarga Independent Pre-University College, Kollegal	2022
Class 12th – PERCENT – 61	
Bharati Residential Compositive Per-University College, Mandya	2020
Class 10th – PERCENT -91.98	

PROJECTS

Psychography Machine

- Developed an AI-powered system for generating coherent and context-aware text using deep learning and natural language processing. Implemented neural networks to automate content creation, including articles, reports, and creative writing.
- Optimized for grammatical accuracy, stylistic consistency, and adaptive tone. Designed for applications in content automation, assistive writing, and personalized text generation.
- Technologies: Python, C, MongoDB

Arduino Polygraph Machine

- In this project, We'll try to get some information from the human body by using simple sensors and Arduino. You can use this information to create a lie detector machine. At the end of this article, you: Know Polygraph and basics of measuring and recording physiological indicators. Will be familiar with Lie Detector systems. Can get data from sensors and analyze them by Arduino. Can measure respiration rate by using ECG electrodes and impedance pneumography.
- Technologies: Arduino IDE, C.

SKILLS

Technical Skills: Coding, Debugging, Data mining, Problem solving, Video gamer, Video editing, UI developer

Languages: Python, C, SQL

People Skills: Good listener, Communicator, Good leadership

My Hobbies: Puzzle solving, Dance, Reading books, Sports, Video games, Listening music

ACHIEVEMENTS

- Solved 100+ Problems in Leetcode, GeeksForGeeks and CodeStudio
- Completed Certification courses in Chatbot building using Python, Machine Translation and many courses like Artificial Intelligence Primer, Deep Learning in Infosys Springboard
- Top 10 Finalist in **Codethon 2.0** Codethon organized by CIT
